TOPSELLER SYSTEM

Dear customer,

Thank you for your interest in our brands. In this price list we offer you equipment in different price ranges, designs and features. In order to help you select your favorite product we have marked "Topseller" equipment in this price list. Topseller are first choice of our customers.

Practical features, high acceptance of customers, best value for money combined with highest resale value distinguishes our products. Topseller versions we generally deliver 2-4 weeks after we receive your order.

Of course we are also happy if you buy a „non Topseller“ version. We are also very happy to produce these units individually for you! Please note, that when you order a “non Topseller” version a 10% prepayment of the list price is due. The delivery time of these products is approx. 4 weeks.

Topseller or not – the entire JK-Team wishes you lots of success with your new equipment.

JK PROFESSIONAL PRICELIST 02/2018

This price list takes effect from 1st February 2018. It will retain validity until a new price list is published. The products offered in this price list are exclusively distributed by JK-International GmbH and their trade partners. The prices quoted are list prices and exclude statutory VAT.

The products indicated in this price list are delivered ex works. Changes in the technical execution and design, price and delivery possibility reserved. All prices for our equipment are excluded time control system.

The products listed must not be exported to or operated in either the USA and Canada JK-International GmbH shall not accept any producer's liability in this case. It is expressly pointed out that any violation of this ban may subject the exporter and/or operator to high risks of liability.

You may obtain all expendable articles, such as bulbs, lamps, starters, Aqua Fresh & Aroma refit kits as well as cleaning and cosmetic products from JK-International GmbH, Koehlershohner Strasse, 53578 Windhagen, Germany, phone +49 2224/818-600.

WARRANTY

JK-International GmbH guarantees the purchaser for a period of 24 months starting from the date of delivery that the goods are free from defects which would ruin or reduce their value or usual merchantability. High-pressure lamps, low-pressure lamps and starters as well as base acrylics are components that are subject to a process of natural wear. Defect-related claims on part of the purchaser shall be ruled out if the product defect is the result of wear.

QUALITY PAYS – 10 GOOD REASONS FOR ERGOLINE

When dealing with the sun quality is paying off. The factors of success can be easily combined: Excellent products, excellent service, an excellent business concept and especially well-known brand names. Ergoline gives you that competitive edge. But don't take our word for it, compare Ergoline with the rest; you don't want to settle for less.

EXCELLENT BRAND NAME

Ergoline is by far the world's most popular sunbed brand name amongst salon owners and customers alike. There are good reasons for that. Deciding for a professional sunbed from the worldwide market leader means setting the scenes for success in the tanning business. You benefit not only from our product's reliability and long service life in the endurance test that is everyday salon operation, but also the low depreciation on all our models when it comes to selling your used Ergoline sunbed.

APPROVED SAFETY

Ergoline keeps you on the safe side. Our models carry the German TÜV seal and GS "tested safety" kitemark, and naturally the statutory CE label. All components that need to be accessible for maintenance and servicing are easy to reach, and are equipped with multiple backup safety features with an intelligent protection system, switching off automatically if a malfunction is detected.

GUARANTEED QUALITY

All components we use in our sunbed production are made of high-quality materials, which are all tested for resistance against UV light, cleaning fluids and other potential hazards as well as potential health risks. Our state-of-the-art manufacturing technologies and

qualified staff ensure especially high-quality workmanship. Every Ergoline sunbed undergoes a variety of functional tests before it leaves the factory. We were the first sunbed manufacturer to be certified by TÜV for compliance with the EN ISO 9001 quality standard, confirming our claim to quality.

EXCELLENT SERVICE

If you should experience technical problems with one of your Ergoline sunbeds, we have a complete service network to fix the problem. We guarantee prompt and professional repairs by authorised and qualified service technicians. Our technicians carry a wide range of commonly used spare parts. As an added support, thousands of parts are stored at our state-of-the-art logistics centre.

TRENDSETTING DESIGN

Often, you'll only really appreciate excellent design after years of use. This is why you will not find any superficial trends or gimmicks on our sunbeds. Clear lines, quality surface finishes and fascinating lighting effects will inspire your customers now and in years to come. Furthermore, the LED Light Show provides a fascinating light presentation and many individualisation possibilities. Make your daily studio routine more colourful!

COMFORT SECOND TO NONE

Our ergonomic concepts give you and your customers tanning comfort and convenience that is second to none. Or Climatronic cooled air conditioning for exact tanning temperature adjustment. Aqua Fresh & Aroma will give your customers a particularly refreshing tanning experience. Innovative 3D sound systems give you perfect musical enjoyment.

EASY HANDLING

Every Ergoline sunbed has been designed to ensure that all components that require servicing are easily and quickly to reach. Low-maintenance materials ensure easy cleaning for your salon staff. The Professional Set-up Manager provides an extraordinary sunbed management. Whether you choose the light program, sound settings or adjust air condition and ventilation – all settings perform easier and faster than ever. With the NFC Connect you can transfer the entire configuration to other sunbeds.

INNOVATIVE UV TECHNOLOGIES

Ergoline's innovative UV systems lead the world. The company's in-house Development Centre has regularly launched new cutting-edge technologies to increase tanning power, energy efficiency, and naturally also safety in sunbeds. Our Hybrid Performance technology sets new standards in tanning technology. This unique combination of UV and red light delivers a particularly attractive and long-lasting tan with simultaneous skin care. Another totally new feature is Personal Sunstyle. Every customer can have their personally select their tan at the touch of a button. The maximum output of lamps and facials is adapted to the national regulations.

EXCELLENT SUPPORT FOR YOUR SALON

Ergoline has set standards in professionalising the tanning business with regular training programmes and courses. We also provide high-profile advertising and Point of Sale sales support with high-impact marketing concepts, numerous videos and attractive campaign materials.
